

## TeamQuest Probes for Clear Path OS 2200 Systems

### Observe the Performance of Your Systems

The TeamQuest Clear Path OS 2200 Systems Software family includes products in several categories:

Performance Analysis and Capacity Planning, Modeling, System Management, Tools and Utilities

**TeamQuest Probes** (Probes) provides data collectors for Message Control Bank (MCB) applications, mass storage, system level TIP, and Universal Data System (UDS) applications for your ClearPath and 2200 Series systems. Probes is an add-on package that supplements the data provided in TeamQuest Baseline. TeamQuest Baseline is a performance analysis package that collects and displays system resource information for hardware components and software applications. It offers a wide range of statistics, including detailed information on CPU, memory, I/O, disk, network, process, and operating system internals.

### Comprehensive Data Collection

Probe	Data Collected
MCB	Statistics on Message Control Bank (MCB) buffer pool activity, MCB message retention files, and MCB message functions, as well as statistics on application group activities
Mass storage	Statistics about the use of mass storage devices (by disk, equipment type and system) and provides information about fixed and removable devices, as well as local and shared devices
UDS	Statistics on UDSC bank utilization, user thread activity, I/O activity and thread queuing activity
System Kons	Statistics on overall system level TIP activity, transaction load profile, average transaction existence time
